

# Machinery Performance and Condition Monitoring Services

*Machinery Condition Monitoring Service can provide the resources and expertise to move your program from where you are today to where you want to be.*

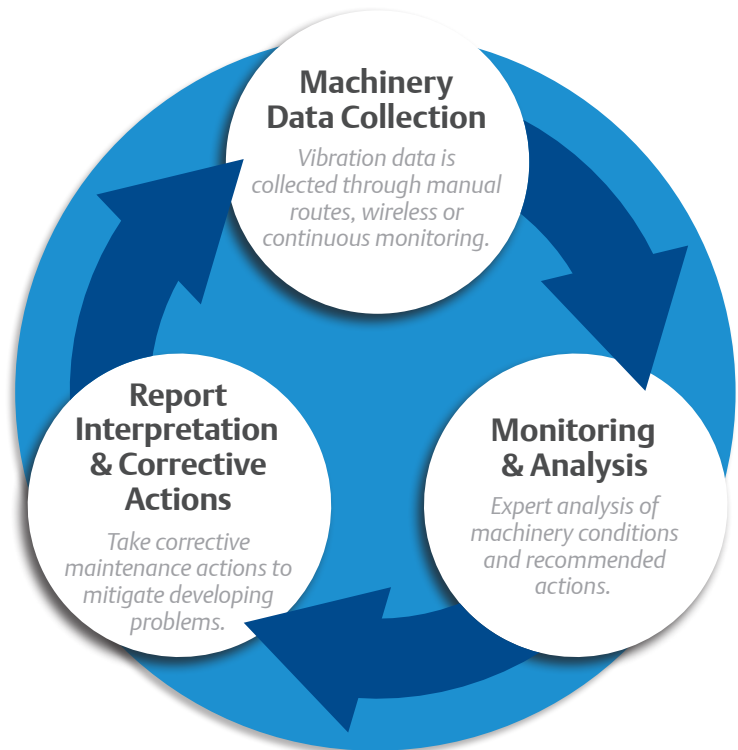

## Does your program lack:

- **Insight into developing issues?**
- **Resources to manage your condition monitoring program?**
- **Expertise with advanced technology?**

Emerson offers a machinery condition monitoring solution to improve your plant's overall reliability. Use this service to optimize your existing condition monitoring program.

Let the experts at Emerson take care of all the details: from analysis of your offline route-based data and continuous monitoring systems, to machinery condition reports tailored to your requirements. Emerson will provide recommendations on when and where to focus your maintenance resources.

Our global network of certified analysts will support your operations, and can help standardize your condition monitoring program across all sites. Change your maintenance activities from reactive to predictive and start moving your condition monitoring program to the next level.
