

# IECEX Certificate of Conformity

## INTERNATIONAL ELECTROTECHNICAL COMMISSION IEC Certification Scheme for Explosive Atmospheres

for rules and details of the IECEx Scheme visit [www.iecex.com](http://www.iecex.com)

Certificate No.: IECEx LCIE 18.0016X

Issue No: 0

Certificate history:

Issue No. 0 (2018-06-08)

Status: **Current**

Page 1 of 3

Date of Issue: **2018-06-08**

Applicant: **ASCO SAS**  
53, rue de la Beauce  
28110 Lucé  
**France**

Equipment: **Pneumatic manifold - Type : \*501AV\*\*\*\*0\*\*\*\***

Optional accessory:

Type of Protection: **Ex ec**

Marking:  
Ex ec IIC T4 Gc

(Refer to attachment for full marking)

Approved for issue on behalf of the IECEx  
Certification Body:

Julien Gauthier

Position:

Certification Officer

Signature:  
(for printed version)

Date:

2018-06-08

1. This certificate and schedule may only be reproduced in full.
2. This certificate is not transferable and remains the property of the issuing body.
3. The Status and authenticity of this certificate may be verified by visiting the [Official IECEx Website](http://www.iecex.com).

Certificate issued by:

**Laboratoire Central des Industries Electriques (LCIE)**  
**33 Avenue du General Leclerc**  
**FR-92260 Fontenay-aux-Roses**  
**France**

# IECEX Certificate of Conformity

Certificate No: IECEx LCIE 18.0016X

Issue No: 0

Date of Issue: **2018-06-08**

Page 2 of 3

Manufacturer: **ASCO SAS**  
53, rue de la Beauce  
28110 Lucé  
**France**

Additional Manufacturing location(s):

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

## STANDARDS:

The apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

**IEC 60079-0 : 2011** Explosive atmospheres - Part 0: General requirements  
Edition:6.0

**IEC 60079-7 : 2015** Explosive atmospheres – Part 7: Equipment protection by increased safety "e"  
Edition:5.0

*This Certificate **does not** indicate compliance with electrical safety and performance requirements other than those expressly included in the Standards listed above.*

## TEST & ASSESSMENT REPORTS:

*A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in*

Test Report:

## Schedule

### EQUIPMENT:

*Equipment and systems covered by this certificate are as follows:*

Pneumatic manifold, type \*501AV\*\*\*\*0\*\*\*\*, is based on electrical spool valves assembly with centralized electrical and pneumatic connections. The electrical connection is made by a direct connection module, called Multipol, or by a fieldbus electronic type P580AE\*\*\*010\*\*\* (IECEX LCIE 18.0018X) or type G3\*\*\*\*0\*\*\* (IECEX LCIE 18.0019X).

The subbases are used for centralizing pneumatic and electrical connections. Spool valves outlets are directly connected to these subbases.

Specific accessories can be added, such as electrical input and Output modules, and additional pneumatic features, as a pneumatic shut-off accessory (for stopping the inlet pressure of a spool valve during maintenance phases) and a blank plate (to close all pneumatic ports of a spool valve).

(Refer to attachment for range details)

### Instructions:

Installation and Maintenance Instructions, 501, Ref. 531322-001

### SPECIFIC CONDITIONS OF USE: YES as shown below:

- The equipment shall only be used in an area of at least pollution degree 2, as defined in IEC 60664-1 standard.
- For final installation, the pneumatic manifold must be connected in compliance with IEC 60079-14 standard requirements, providing and maintaining an enclosure with minimum ingress protection of IP 54.
- Transient protection shall be provided that is set at a level not exceeding 140 % of the peak rated voltage value at the supply terminals to the equipment.
- The equipment shall be installed according to the instruction manual provided by the manufacturer.

### Annex:

--	---

## Accessories mounted on the pneumatic manifold :

- Sandwich shut-off accessory
- Blank plate
- Blocking disc

## RATINGS

Supply voltage : 24 V DC  
Power : 1 to 108 W

## ROUTINE TESTS

According to clause 7.1 of standard IEC 60079-7, each pneumatic manifold, type \*501AV\*\*\*\*0\*\*\*\*, shall be submitted before delivery to a dielectric strength test (carried out in accordance with clause 6.1) under 500 V DC during 60 seconds.

## APPARATUS OVERVIEW
