

# Minimize Disruption of Plant Operations Get Components Exchanged Quickly

## Component Coverage

The lifecycle services team stands ready to eliminate costly interruptions to plant operations by replacing failed components.

For a predetermined subscription fee based on your specific inventory and operational needs, Component Coverage provides for the replacement of Emerson-supplied failed components during the lifecycle services contract term.

A staff of highly trained technicians and inspectors follow strict methodologies to ensure that failed critical parts are properly identified and are replaced with thoroughly tested replacements having the latest improvements and upgrades, thereby minimizing downtime, and maximizing the efficiency of plant operations. If a specific component is no longer available or manufactured, our team will identify and provides its functional equivalent as applicable.

Throughout the process, our service team works quickly to ensure minimal disruptions to normal plant operations.
