

8732EM Revision 4 Electronics Spare Parts Kit

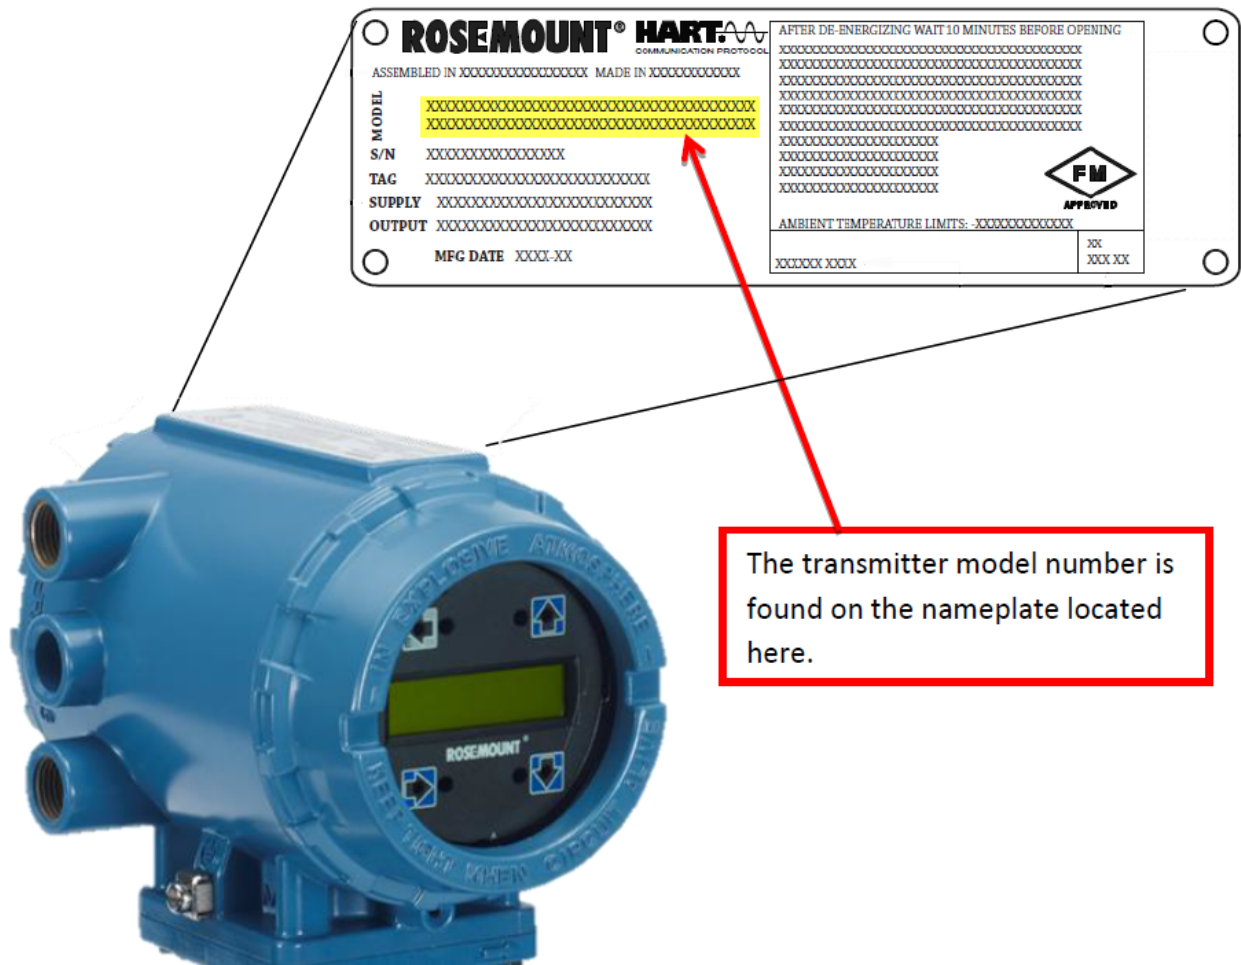

Thank you for ordering a spare electronics kit for your 8732EM Revision 4 transmitter. Contained in this package you will find the complete replacement electronics stack for your transmitter.

Prior to installing the spare electronics, it is important to verify that the transmitter housing you have is of the correct design to accept the Revision 4 electronics.

Follow the steps below to confirm the transmitter housing is compatible with this electronics kit.

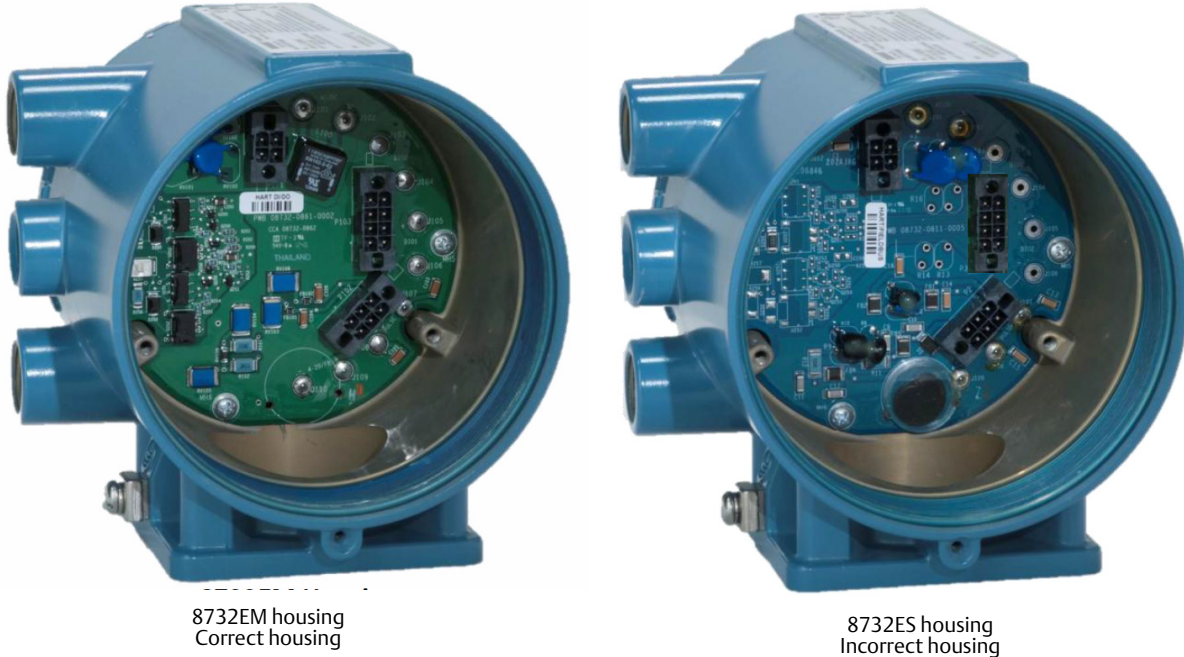

1. Verify the model number is 8732EM. If the transmitter model is not 8732EM, then these electronics are not compatible. See [Figure 1](#) for the location of the model number. If the model is 8732C, 8742C, 8732ES, or some other model, then these electronics are not compatible with the enclosure. If you have one of these transmitters, a full replacement transmitter will be required. Consult the 8700M Product Data Sheet (00813-0100-4444) for details on ordering a new transmitter.

2. Verify the electronics board inside the housing is green and looks like the board pictured on the left in [Figure 2](#). If the board is not green, or does not look like the board pictured, then the electronics are not compatible.

Figure 2. Transmitter Housing Electronics Board Identification

3. Confirm the electronics is for an 8732EM transmitter. Refer to the picture on the left in [Figure 3](#).
