

Probe Mounting Bracket

The advantage of external mount probes is that the probes are accessible while the machine is running. If external mounting is not possible, then internal mount is an option. This bracket facilitates the internal mount design.

The internal mount brackets are complete with M5 x 35 mm mounting screws and lock washers. The bracket is designed so a lock nut is not required to secure the probe.

Brackets are available for the following transducer threads:

- M6x0.5 (PR6422)
- 1/4"-28UNF (EZ105x, PR6422)
- M8x1 (EZ105x)
- M10x1 (EZ108x, PR6423)
- 3/8"-24UNF (EZ108x, PR6423)
- M18x1.5 (EZ116x, PR6424, PR6425)

- Easy mount design
- Allows adjustment of initial gap
- Proven design for precise transducer mounting
- Complete with screws and lock washers
